

Using a Searchable PDF File

How to use searchable PDF file

The Pine Grove CCWPP is a very long document. Most people will only be interested in their street's risk assessment and possibly a few streets nearby. Review the risk assessment table in Chapter 2 Section 2.3, *Summarizing Risk in The Greater Pine Grove Planning Unit*. This table lists all streets alphabetically. The second column next to the street name is an area name. Open Chapter 3's bookmarks by clicking on the bookmark icon (see figure 1). Scroll down to the area name in the bookmarks, then click on the street name to jump to the risk assessment for that street (see figure 2).

Figure 1

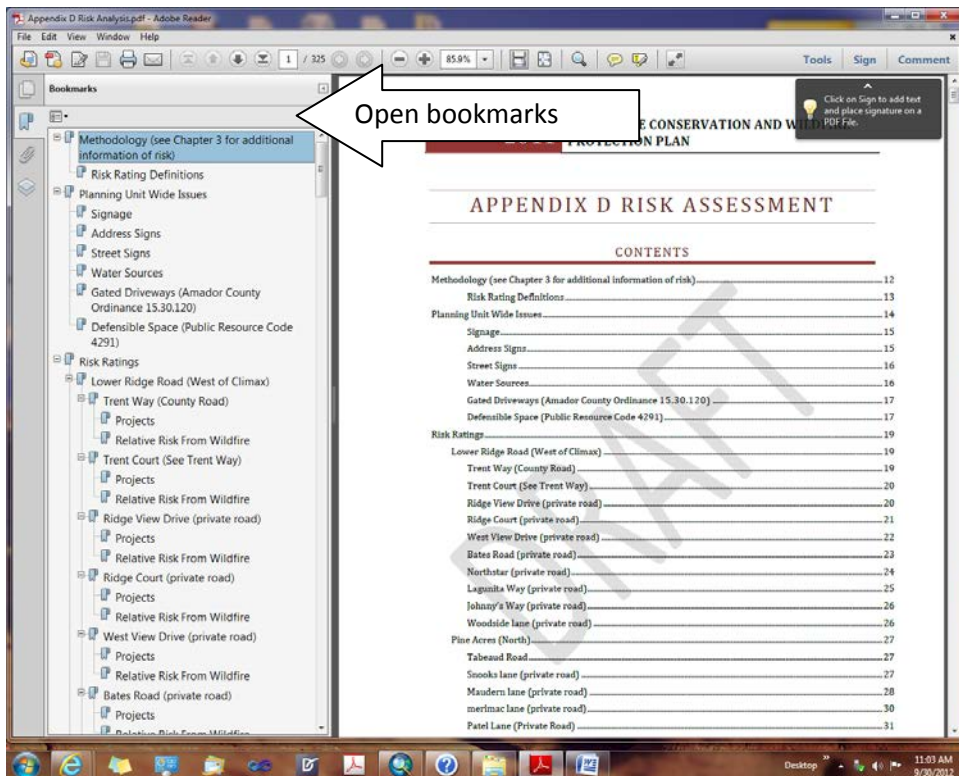

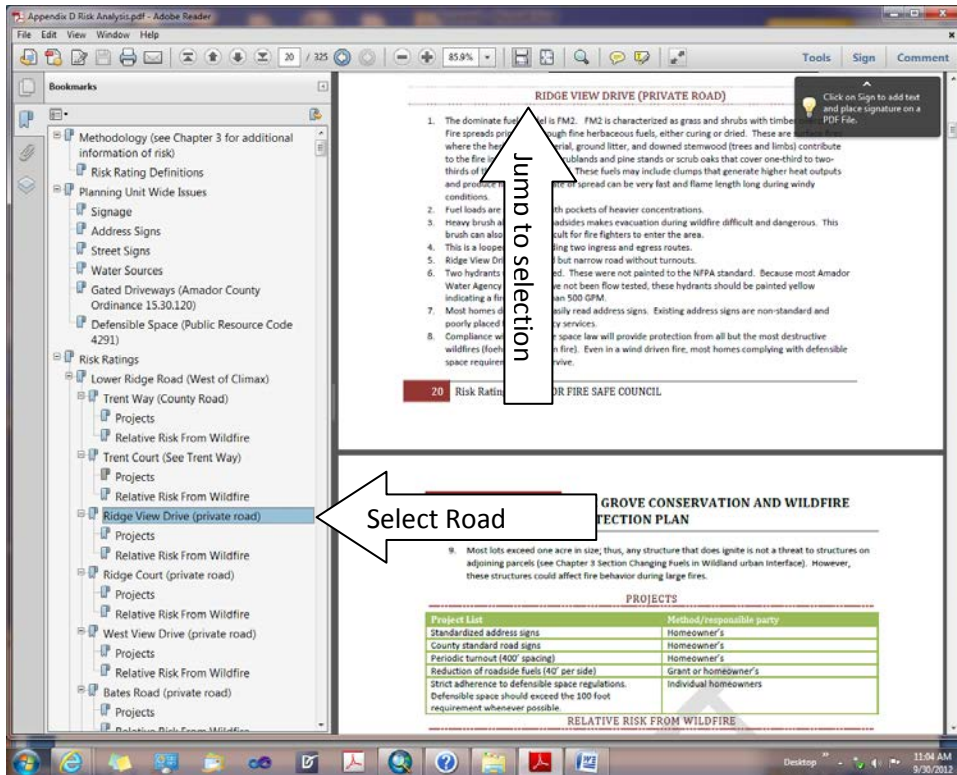

Figure 2

Each street will have a list of issues identified by the assessment process, a list of projects that landowners can do to improve the wildfire safety for their homes and neighborhood, and a risk rating based on the assessment.
