

Amador County Wildfire Collaborators

OCTOBER 14TH, 2026 | 2:00 PM
AMADOR COUNTY ADMINISTRATION BUILDING
810 COURT STREET, JACKSON CA 95642

Agenda

- 1.Introductions
- 2.Grant proposal status updates
- 3.Relevant updates from members
- 4.Mapping Discussion**
- 5.Set next meeting topic, date
- 6.Follow-up items

Grant proposal status update

- BLM Fuels Management and Community Fire Assistance Program 2026 AFSC Proposal: Mokelumne Rim Fuel Break Implementation and Amador County Wildfire Planning GIS Initiative

Met criteria, not funded, but held on file through March 2027.

- CAL FIRE Wildfire Prevention grants 2026-2027: no official response yet
- CAL FIRE Forest Health grants 2026-2027: ARCD one full application under review
- Sierra Nevada Conservancy: AFSC preparing one fuel break application

Mapping Discussion

Today's Objectives

- a) Share platform structure and app functionality
- b) Security
- c) Identify desired additional content, sources, responsible parties

Platform structure and app functionality

<https://experience.arcgis.com/experience/345066c9880d41f98bb95e84f4eeb41b>

- Current “Experience Builder” application is limited.
- Suggested improvements:
 - Improve the symbology and visual consistency of the map layers.
 - Reorganize and simplify the layer list to make datasets easier to find.
 - Improve pop-ups to display more relevant and understandable information.
 - Explore additional functionality, such as better search, filtering, and navigation tools.
- **Working group to review and direct Consultant to make changes**

Security

- Currently: application is public, confidential layers are hidden to those outside of AFSC/ARCD organization
 - Hidden layers: Energy Facilities (18), Water Facilities (72), Critical Structures: businesses and public buildings (906), Aboveground water delivery (1)
 - Hidden layers are viewable with a AFSC/ARCD ArcGIS account login
 - Treatment layers may also be made confidential

Identify desired additional content, sources, responsible parties

- Four categories of data:
 - Baseline: roads, streams, parcels, topography, jurisdictions,...
 - CWPP outputs: periodically updated analyses
 - Assets: water, energy, critical structures, communications, ...
 - Frequency of update?
 - Treatments: fuel breaks, ingress & egress routes, grazing allotments, forest health improvements...
 - Frequency of updates

[Identify contributors](#)

GIS Working Group – Next Steps

- a) Existing layers to keep or archive
- b) List data types to develop standard attribute table structure for treatment data.
- c) Is a standard attribute table structure needed for asset data?
- d) Review platform structure and app functionality improvements with AFSC/ARCD and Consultant

Next meetings

ACWC meeting: Wednesday, December 9th

GIS Working Group meeting: TBD

Outreach & Education Working Group meeting: TBD
